

# TRANSPORTATION INDUSTRY FIRST AID KIT

## Federally Approved right across Canada – 1 or 2 Drivers

We offer a **specially priced, specially designed** Federal regulated and WSIB approved First Aid Kit for legal use right across Canada – all ten provinces – that meets and surpasses all your drivers needs and vehicle requirements. This one kit does it all. Each of our First Aid Kits contains the medical necessities for immediate emergency care and exceeds the Federal occupational health and safety code regulations. However in our kit we add a number of extra items over and above the regulations to help keep each of our kits lasting and being effective even longer. We add twice the number of bandages and adhesive tape to each kit. From our past experience we have found these to be the most commonly used items – by supplying more it keeps each of your kits up to code longer. Each first aid kit comes in a high impact 8" X 5" X 3" white plastic easy to open and close container. With a minimum order of 50 first aid kits we can bring your company's name, logo, phone number, website address to life with our custom 1 to 3 color screen printing. There is a onetime charge print set-up fee normally for this service plus the cost of each color added. However with our volume pricing schedule you end up with a superior first aid kit, with extra components of the most commonly used items, all custom imprinted and delivered (freight and shipping included) all for **one special price that can be up to 50% off regular pricing!**
